

Product Information

Anti-DNP

produced in rabbit, delipidized whole antiserum

Catalog Number **D9656**

Product Description

Anti-DNP is produced in rabbit using DNP-BSA as the immunogen. The antiserum has been treated to remove lipoproteins.

Reagents

Supplied as a liquid containing 15 mM sodium azide as a preservative.

The product is determined to be reactive with DNP-BSA and DNP-RSA but not BSA (bovine serum albumin) or RSA (rabbit serum albumin) by immunoelectrophoresis (IEP).

Precautions and Disclaimer

This product is for R&D use only, not for drug, household, or other uses. Please consult the Material Safety Data Sheet for information regarding hazards and safe handling practices.

Storage

For continuous use, store at 2-8 °C for up to one month. For extended storage, the solution may be frozen in working aliquots. Repeated freezing and thawing or storage in "frost-free" freezers, is not recommended. If slight turbidity occurs upon prolonged storage, clarify the solution by centrifugation before use.

Product Profile

Indirect ELISA: a working dilution of 1:8,000 is determined using 5 ug/ml DNP-BSA for coating.

Note: In order to obtain the best results in various techniques and preparations we recommend determining the optimal working dilutions by titration
