

**RABBIT ANTI-MOUSE FIBRONECTIN  
POLYCLONAL ANTIBODY**

|                            |                                                                                                                                                                                                           |                       |         |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|---------|
| <b>CATALOG NUMBER:</b>     | AB2033                                                                                                                                                                                                    | <b>QUANTITY:</b>      | 100 ug  |
| <b>LOT NUMBER:</b>         |                                                                                                                                                                                                           | <b>CONCENTRATION:</b> | 1 mg/mL |
| <b>SPECIFICITY:</b>        | This antibody reacts with mouse fibronectin. Shows less than 0.1% reactivity with mouse Laminin, and Collagen Types I, III, and IV by radioimmunoassay.                                                   |                       |         |
| <b>IMMUNOGEN:</b>          | Fibronectin extracted and purified from mouse plasma.                                                                                                                                                     |                       |         |
| <b>APPLICATIONS:</b>       | Immunohistochemistry: 1:80 dilution for immunofluorescent staining of frozen mouse skin and liver tissues.<br>RIA<br>ELISA: 1:200<br><i>Optimal working dilutions must be determined by the end user.</i> |                       |         |
| <b>SPECIES REACTIVITY:</b> | Mouse. Reactivity with other species has not been determined.                                                                                                                                             |                       |         |
| <b>FORMAT:</b>             | Affinity purified immunoglobulin.                                                                                                                                                                         |                       |         |
| <b>PRESENTATION:</b>       | Liquid in 0.01M phosphate, 0.09M NaCl, pH 7.2 with no preservatives.                                                                                                                                      |                       |         |
| <b>STORAGE/HANDLING:</b>   | Maintain frozen at -20°C for up to 12 months. Avoid repeated freeze/thaw cycles.                                                                                                                          |                       |         |

*For research use only; not for use as a diagnostic.*

**Important Note:** *During shipment, small volumes of product will occasionally become entrapped in the seal of the product vial. For products with volumes of 200 µL or less, we recommend gently tapping the vial on a hard surface or briefly centrifuging the vial in a tabletop centrifuge to dislodge any liquid in the container's cap.*
