

Product Information

Donkey Serum

D9663

Product Description

Donkey Serum is a pooled preparation obtained from a normal donor herd.

Immunoelectrophoresis against anti-donkey serum results in multiple arcs of precipitation. The presence of endogenous antibodies has not been assayed.

Reagents

This product is provided as a liquid containing preservative.

Precautions and Disclaimer

Consult the SDS for information regarding hazards and safe handling practices.

Storage/Stability

For continuous use, store at 2-8 °C for up to one month. For extended storage, the solution may be frozen in working aliquots. Repeated freezing and thawing is not recommended. Storage in "frost-free" freezers is not recommended.

Product Profile

Normal donkey serum is often used as a blocking agent or negative control in immunoassays.

Notice

We provide information and advice to our customers on application technologies and regulatory matters to the best of our knowledge and ability, but without obligation or liability. Existing laws and regulations are to be observed in all cases by our customers. This also applies in respect to any rights of third parties. Our information and advice do not relieve our customers of their own responsibility for checking the suitability of our products for the envisaged purpose.

The information in this document is subject to change without notice and should not be construed as a commitment by the manufacturing or selling entity, or an affiliate. We assume no responsibility for any errors that may appear in this document.
